

Drowning in paper?

The smart solution:

Collect all those papers, letters, notes, and magazine, newspaper articles. Add your digital documents, PDFs, email messages, Web addresses. And collect them in one single place — on your Mac.

DEVONthink Professional Office is the smart repository for all that valuable data you have collected. The Fujitsu ScanSnap is the fast document scanner for your Mac. Together they're the perfect team.

DEVON*think* PRO OFFICE

Store documents: Texts, PDFs, images, bookmarks, ...

Clip data from documents and Web pages

Create documents: Edit in full screen, cross-reference

Artificial Intelligence makes structure out of chaos

Automatic classification, 'see also' function, AI-based search

Integrate using Automator and AppleScript

Surf the Web, integrated document-based Web browser

Integrate live pages and local documents seamlessly

Read RSS feeds, clip important information

Scan documents and store them in a searchable form

Directly scan from the Fujitsu ScanSnap to your database

Integrate your email with your other documents

Share your knowledge through the built-in web server

Access your data from your iPhone, anywhere, anytime

Going paperless made easy:

Put your documents into the automatic document feeder of the Fujitsu ScanSnap S510M scanner. Then push the 'Scan' button. The S510M digitized both sides of the document instantly. When the document is fully scanned, DEVONthink Pro Office kicks in. It receives the arriving image-only PDF and automatically makes it searchable. Finally it files it in your database.

Fujitsu ScanSnap S510M

Fast workplace document scanner

Scans up to 50 pages in a batch

All formats from A4 to letter, even business cards

Carrier sheet allows to scan sheets up to A3

Scans up to 18 ppm/ 36 ipm at 150 dpi and in color

Optical resolution 600 dpi

Easy 'One Touch' PDF creation.
