## **DEVONTHINK PERSONAL EDITION 1.1 AVAILABLE**

Bietigheim-Bissingen (Germany, EU), 7th of April, 2002 -- DEVONtechnologies introduces version 1.1 of its knowledge management solution, DEVONthink.

Based on the flexible yet robust and language independent DEVONtechnology, it is a completely new knowledge base ideal for storing, organising and retrieving documents, pictures, source codes, multi-media files, code-fragments or structured data (HTML, XML) of any kind.

Without the need for indexing, DEVONthink automatically classifies new imported elements, lists similar contents and keywords, finds text using fuzzy logic or listing alternative words, compares images, summarises articles intelligently and provides concordance tools. »The outstanding feature of our software is that the results get better the more contents you have stored in your knowledge base. Also, we have integrated it perfectly into Mac OS X and included a service that allows you to comfortably store and summarise text clippings«, says Christian Grunenber, President Technology and Application Development, DEVONtechnologies.

DEVONthink Personal Edition 1.0 was published on Sunday, 31st of March. Version 1.1 improves reliability and performance and introduces a new feature called »replicants«, hard-wired siamese twin copies of stored contents that allow for example to file contents in more than one group at the same time.

DEVONthink Personal Edition 1.1 runs on Mac OS X 10.1 or higher and is immediately available as a free download from [www.devon-technologies.com](http://www.devon-technologies.com). It must be registered for US\$ 34,95 after the two weeks evaluation period.
