### **DEVONTHINK PERSONAL EDITION 1.2.4 AVAILABLE**

Bietigheim-Bissingen (Germany, EU), 12th August, 2002 -- DEVONtechnologies updates its next generation information manager to version 1.2.4.

The maintenance update introduces a check-for-updates function which lets users find out with a single click if their application is still up-to-date, speeds up the whole application and corrects some bugs. Additionally, some interface glitches have been removed to make DEVONthink Personal Edition even easier to use, and the programme is now localisation-savvy. The first languages will be German and Japanese, available with the next major release.

Without the need for any indexing at all, DEVONthink fully or semi-automatically classifies elements, lists similar contents and words immediately using fuzzy algorithms, finds and compares text and even images, summarises texts intelligently and provides high performance concordance tools. As a Cocoa application it's perfectly integrated into Mac OS X including it's own services for storing and summarising text clippings, has advanced text editing functions including rulers and provides a Finder-like interface with contextual menus, different views and drag-and-drop. Finally, DEVONthink is the first product based on the powerful and language independent DEVONtechnology.

DEVONthink Personal Edition 1.2.4 runs on Mac OS X 10.1 or higher and is immediately available as a free download from [www.devon-technologies.com](http://www.devon-technologies.com). It must be registered for US\$ 39,95 after the two weeks evaluation period.
