DEVONTHINK PERSONAL EDITION 1.5.1 AVAILABLE

Bietigheim-Bissingen (Germany, EU), 10th of March, 2003 --

DEVONtechnologies updates its revolutionary information manager and freeform database to version 1.5.1.

DEVONthink Personal Edition 1.5.1 features a new »Open externally« command to open selected contents in external viewers or editors, a Finder toolbar script to import the contents of the frontmost window into DEVONthink and introduces the ability to name knowledge bases (the Standard Edition of DEVONthink will allow to use more than one knowledge base). Also, the very handy Dock menu has been extended and the integrated help improved.

The many invisible changes include much faster display of PDF contents, faster saving of changes, and faster display of thumbnails due to a thumbnail cache. Additionally, the »Verify and repair« functions, the overall data security and the memory footprint have been improved.

Without the need for indexing, DEVONthink fully or semi-automatically classifies elements, lists similar contents and words immediately using fuzzy algorithms, finds and compares text and even images, summarises texts intelligently and provides high performance concordance tools. As a Cocoa application it's perfectly integrated into Mac OS X including it's own services for storing and summarising text clippings, has advanced text editing functions including rulers and provides a Finder-like interface with contextual menus, Dock menus, different views and drag-and-drop. Finally, DEVONthink is the first product based on the powerful and language independent DEVONtechnology which is suitable for a wide range of applications.

DEVONthink Personal Edition 1.5.1 runs on Mac OS X 10.1 or higher and is immediately available as a free download from www.devon-technologies.com. It must be registered for US\$ 44,95 after the two weeks evaluation period.
