## **DEVONTHINK IS NOW ALSO AN OUTLINER AND A NOTEPAD**

Bietigheim-Bissingen (Germany, EU), 12th of August, 2003 --  
DEVONtechnologies releases a new version 1.7 of its revolutionary information manager and freeform database DEVONthink Personal Edition.

The new outline feature allows every content stored in DEVONthink to be checkable, a simple but extremely effective way of melding the »best of both worlds«, of an outliner and a freeform database. Also, with version 1.7 it's now possible to edit text or RTF contents directly in any browser window, making DEVONthink an easy-to-use but full-featured, powerful notepad application.

Additional new features of DEVONthink 1.7 are a syntax colouring option for HTML and XML, a must-have for everyone writing mark-up code within DEVONthink, a highlighting toolbar button to simply highlight selected text like one would do with a text marker, and a command for converting PDF and HTML contents to plain and rich text. Images, HTML and text contents can now be zoomed in and out, and a realtime character and word count helps writers and editors to create articles of a predefined length. As with every release, DEVONthink is also faster, uses less memory and is more stable than ever.

Without the need for indexing, DEVONthink fully or semi-automatically classifies elements, lists similar contents and words immediately using fuzzy algorithms, finds and compares text and even images, summarises texts intelligently and provides high performance concordance tools. As a Cocoa application it's perfectly integrated into Mac OS X including it's own services for storing and summarising text clippings, has advanced text editing functions including rulers and provides a Finder-like interface with contextual menus, Dock menus, different views and drag-and-drop. Finally, DEVONthink is the first product based on the powerful and language independent DEVONtechnology which is suitable for a wide range of applications.

DEVONthink Personal Edition 1.7 runs on Mac OS X 10.1 or higher and is immediately available as a free download from [www.devon-technologies.com](http://www.devon-technologies.com). It must be registered for US\$ 35 after the evaluation period.
