UPDATES: PHOTOSTICKIES 5.1, THUMBSUP 4.0; WEBSITE RELAUNCHED

London (UK, European Union), 28th of July, 2004 – DEVONtechnologies Ltd. updates its shareware web cam and image viewer PhotoStickies and its free thumbnail generator ThumbsUp.

-The new version 5.1 of PhotoStickies displays images with full opacity when the user moves the mouse pointer over it, features »Copy/Paste Filters« commands and introduces handy shortcuts to switch between the four areas of the Inspector panel. Also, PhotoStickies 5.1 adds a »Post Cam« command to the »Control« menu, is able to set the threshold of »Black & White« filters and comes with an overall improved performance and compatibility with more web cam servers.

The freeware thumbnail generator ThumbsUp 4.0 now also generates thumbnails of QuickTime movies — as the first application of its kind.

Besides updating its share- and freeware applications, DEVONtechnologies has completely revamped its website, www.devon-technologies.com. The new site is much more user oriented, a lot easier to navigate and more friendly to the eye.

PhotoStickies and ThumbsUp require Mac OS X 10.2 or later and are immediately available as a free download from www.devon-technologies.com. PhotoStickies must be registered for US\$ 12 to remove the shareware reminders.
