MAINTENANCE UPDATES: EASYFIND 3.6, THUMBSUP 4.2 AND XMENU 1.7

Coeur d'Alene (Idaho, USA), 7th of July, 2005 -- DEVONtechnologies LLC updates three of its famous freeware utilities: the powerful and flexible find-file utility EasyFind, the image scaler and converter ThumbsUp and the menu bar launcher XMenu.

With EasyFind 3.6, users can now search all, all local or all removable volumes directly from the search pop-up menu and sort the found files more accurately. Also, the general performance has been improved and a few minor bugs have been fixed.

Compared to Mac OS X 10.4 Tiger's Spotlight, EasyFind offers a full range of advantages for people who want to seriously find files – accurately. EasyFind finds files and folders without indexing, supports read-only and removable volumes and searches even files and directories that Spotlight doesn't, for example hidden files, files in packages or files and folders in the system directories. Additionally, EasyFind offers much more powerful operators and supports Unix-style wildcards for more accurate search runs. In short: EasyFind finds what the user is looking for, not what Spotlight has coincidentally indexed.

ThumbsUp 4.2 now allows to create thumbnails or convert pictures to JPEG 2000 (this function requires Mac OS X 10.4 Tiger or later), and XMenu 1.7 improves compatibility with Mac OS X 10.4 Tiger when used as start-up item.

EasyFind 3.6, ThumbsUp 4.2 and XMenu 1.6 are freeware, run on Mac OS X 10.3 or later and are immediately available for downloading from www.devon-technologies.com.
