FREWARE UPDATES, PART 1: EASYFIND 4.0 — AND PHOTOSTICKIES 5.6

Coeur d'Alene (Idaho, USA), October 11, 2007 – DEVONtechnologies, LLC releases updates for the super-fast find-file utility EasyFind as well as for the now free photo viewer PhotoStickies.

Most importantly, PhotoStickies 5.6 is now freeware again and can be downloaded and be used free of charge. In addition, the new version features many detail enhancements such as combined tabs in the Inspector panel, better "TV" display style, and an optimized and more reliable HTML parser. PhotoStickies 5.6 is more compatible to certain websites and handles HTTP referrers automatically, too.

The find-file utility EasyFind 4.0 comes with a revised user interface that presents all available options more clearly arranged, remembers recent searches, and shows the file creation date in the results list. The results list can be sorted by creation or modification date, folders can be dropped into the EasyFind window to search just the contents of this folder, and all windows can be minimized at once now. Also, file types and HFS creator codes for searching email files have been added and the underlying search methods are more robust and handle words separated by spaces or non-white separators more consistently.

Finally, both applications are faster now, more robust, and a number of minor bugs and glitches have been fixed.

AVAILABILITY AND PRICING

Both EasyFind and PhotoStickies require Mac OS X 10.3.9 or later. They can be downloaded from www.devon-technologies.com and can be used for free.

BACKGROUND: EASYFIND

As an alternative to or supplement of Sherlock, EasyFind finds files, folders, or contents in any file without the need for indexing. This is especially useful if you are tired of slow or impossible indexing, outdated or corrupted indices, or if you are just looking for missing features like case sensitive or insensitive search, Boolean operators, wildcards, or searching for phrases. In addition, EasyFind uses multithreading and is therefore very responsive, even with multiple search processes running. The application provides contextual menus and Mac OS X Services, and displays the location of each item in a separate column for a better overview. EasyFind uses little memory, supports drag-and-drop and the clipboard, and optionally finds invisible items or items within packages.

BACKGROUND: PHOTOSTICKIES

PhotoStickies puts all your favorite pictures on your desktop, as stickies, floating or even borderless. Sticky pictures may reside on your computer, or on the Internet.

PhotoStickies also displays live webcams on your desktop, updates them automatically, and even records them like a VCR.

KEY FEATURES

- Displays all image formats supported by Mac OS X
- Displays local images, pictures located on the Web or webcams
- Shows images as stickies or as desktop wallpaper
- Many live effects, e.g. alpha channels, transparency, color corrections
- Savable states
- Internet-based list of new webcams
- Can run as a menu extra

CORPORATE BACKGROUND

DEVONtechnologies LLC, founded in 2002, incorporated in 2004 and headquartered in Coeur d'Alene, Idaho, USA, researches in the field of semantic and associative data analysis and synthesis, and develops key applications based on the DEVONtechnology. Named after the Devonian Period, the DEVONtechnology marks the departure into a

new age of data processing. The main focus of all activities is clearly on using the robust, flexible and versatile architecture intelligently to create rock-solid applications for a variety of purposes, including but not limited to databases, intelligent agents, data-mining, information retrieval and human-computer-interfaces.
